This Manuel Builders home has just about everything. Three bedrooms, two full baths, and no carpet. Open concept floorplan, but also the dining room its own space with lovely windows. So much natural light here. Large island in the kitchen, a corner pantry and plenty of countertops. A true foyer is a design dream and we've got one. Split floor plan with two bedrooms, sharing guest bathroom in the front of the house. The spacious primary suite is located in the rear of the home and is large enough for any sized furniture. Coming in from the large garage is a space right near your laundry room that can be used as a drop space. There's also a massive closet in the living room perfect for all your books and games and blankets. One of the most shocking things about this house is how large the fenced-in backyard is. There's also an extended patio. My goodness. You won't find a cleaner or cuter house on the market.
