4 Bedrooms | 2.5 Bathrooms | 2,374 Sqft

Immaculate 4-Bedroom Home with Massive Outdoor Kitchen, Workshop & Incredible Pride of Ownership. This home is truly meant to be lived in. This is an extremely well-maintained, immaculate home that shows some of the best pride of ownership I have ever seen. It offers 4 bedrooms and 2.5 baths. The front bedroom is currently used as an office and could easily serve as a flex room, office, or additional bedroom. The large kitchen features a gas stove. The large den includes a fireplace, and there is also a separate living room--plenty of space to relax and entertain. Out back, you'll find a massive, newly added outdoor kitchen and patio. The kitchen has a gas grill, with an exhaust, fryer & mini frig. Wood look ceramic floors. The patio has electric screens; nonskid decorative concrete floors, perfect for year-round enjoyment. The property also includes a huge workshop, a Generac Generator, a brand-new wooden fence, and a single carport. Even the A/C and Generator has its own covered patio area keeping both safe from the elements. This home is truly immaculate and must be seen to be fully appreciated.
